

## CVL Takes Atlanta

More than two years after the pandemic forced large-scale gatherings to a screeching halt, 20+ members of the CVL attended the Cognitive Aging Conference in Atlanta this spring...

Dear Friends,

We welcome the spring with much enthusiasm as we celebrate re-instituting our program of public events. This began with our annual Booziotis Distinguished Lecture in November 2021 and was followed by our inaugural Spring public lecture – organized in partnership with the Texas Instruments Alumni Association – in March of this year. Both were resounding successes!

We are looking forward to more gatherings in the coming months and, not least, those marking the much-delayed 10th anniversary of the CVL and honoring the extraordinary scientist who founded it, Dr. Denise Park. And, as you'll see from the story above in this newsletter, CVL researchers are once again attending national scientific conferences. We are also continuing to ramp up in-person data collection, working towards our mission of cognitive health for life. As always, I greatly appreciate your continued support of our Center and its research.

## WATCH

### Miss the Lecture?

If you missed the live lecture, you can now watch Dr. William Jagust present *Brain Aging & Alzheimer's Disease: New Insights from New Technologies* on our YouTube channel.
